

Quality Policy

We consider quality management as an essential corporate task and anchored in the management principles. The resources and information necessary to achieve the strategic, operational objectives and for continuous improvement are provided.

For us, quality means that we continuously adapt our entire services to the needs of our customers and the market within the framework of economic feasibility.

We apply the IATF 16949 quality management system to ensure the quality of our products. We ensure the complete fulfillment of the requirements and the constant improvement of its effectiveness.

The basis of our quality policy are our employees.

The goal of all processes is zero-defect production.

Preventive error prevention and continuous improvement requires the use of contemporary and innovative technology combined with the application of modern quality management tools.

The quality policy is the basis for the functioning quality management. The defined goals are regularly checked and updated by the top management.
